SOFTWARE ENGINEER • MOBILE & FULL-STACK DEVELOPER

SUMMARY

Software Engineer and Mobile Application Developer specializing in cross-platform systems with Dart, Flutter, and backend architectures using Supabase, Node.js, and SQL databases. Experienced in engineering real-time ecosystems utilizing WebSockets, WebRTC live audio/video streaming, and native Android background services. Focused on building modular, high-performance applications with clean architecture and solid fundamentals in Data Structures and Algorithms.

SKILLS

- Languages:** Dart, Python, JavaScript, C, SQL, HTML5, CSS3
- Frameworks & Libraries:** Flutter, React.js, Node.js, Express.js, Next.js, Django, Tailwind CSS
- Cloud & Real-Time:** Supabase, Firebase, WebSockets, WebRTC, RESTful APIs, Cloudinary
- Databases:** PostgreSQL, MySQL, Supabase DB
- Developer Tools:** Git, GitHub, Android Studio, VS Code, Postman
- Core Competencies:** Data Structures & Algorithms (DSA), System Design, Native Android Permissions, Problem Solving

EDUCATION

Bachelor of Technology in Computer Science & Engineering (CGPA: 7.08) 2023 - 2027

Babu Sunder Singh Institute of Technology and Management, Lucknow (AKTU)

Class XII, UP Board (Result: 72%) July 2022 - Apr 2023

Urmila Inter College, Raebareli, Uttar Pradesh

Class X, UP Board (Result: 77%) July 2021 - July 2022

Urmila Inter College, Raebareli, Uttar Pradesh

PROJECTS

FlashGet Kids – Child Digital Security & Parental Control Platform Flutter • Supabase

Technologies: Flutter, Dart, Supabase, WebSockets, WebRTC, Cloudinary, Android Background Services

- Engineered a real-time dual-app ecosystem providing parents with remote device monitoring and digital threat protection.
- Implemented low-latency live geolocation tracking and instant geofencing barrier alerts utilizing encrypted WebSockets.
- Integrated silent live screen mirroring and two-way audio-video streaming leveraging WebRTC with Cloudinary media pipelines.
- Configured native Android background services and intent listeners for app-usage monitoring, screen-time locks, and SOS alerts.

Full-Stack Cloud & RESTful API Platform Node.js • Express • SQL

Technologies: JavaScript, Node.js, Express.js, MySQL, REST APIs, Postman

- Designed scalable RESTful APIs with secure user authentication, role-based authorization, and token management.
- Structured relational database schemas with optimized SQL queries, reducing response latency for complex data fetches.
- Built responsive frontend interfaces integrated seamlessly with backend endpoints for end-to-end user workflows.

CERTIFICATIONS

- Completion Certificate – AWS Cloud Practitioner Essentials
- SQL (Basics) Certificate – HackerRank
